

Leveraging GIS Tools and Data to Support the Water Sector

July 25, 2019

Justin Graham, GISP, AWAM
Applied Technologies Practice Leader

Agenda

GIS and the
Water Sector

Advancements in
Technology

GIS Applied

Steps Forward

“GIS is a form of digital mapping technology. Kind of like Google Earth, but better.” **Arnold Schwarzenegger**

Reduce silos of information.

Where are your assets?

Engage and share with others.

Analyze and
gain insight.

Score Distribution - Pie Chart

Getting Started

1. Plan
2. Implement a GIS platform
3. Select schema
4. Import existing inventory (if you have it)
5. Collect new data
6. Assess condition and develop attributes
7. Combine with web services

Enhancing Existing

- Custom Tools
- Asset Management Plan
- Go Enterprise
- Consider new mobile technology available
- Social Media for Customer Engagement
- GIS-based CMMS
- Develop H&H Model
- Integrate with other systems
- Use GIS for long-range planning

What is ahead for GIS?
